Evolution of Composability

The commerce market has evolved from monolithic architectures, to offering highly composable commerce platforms.

However, organizations who need to compose are often left foundationless by vendors who offer limited out-of-the-box feature support.

Monolithic

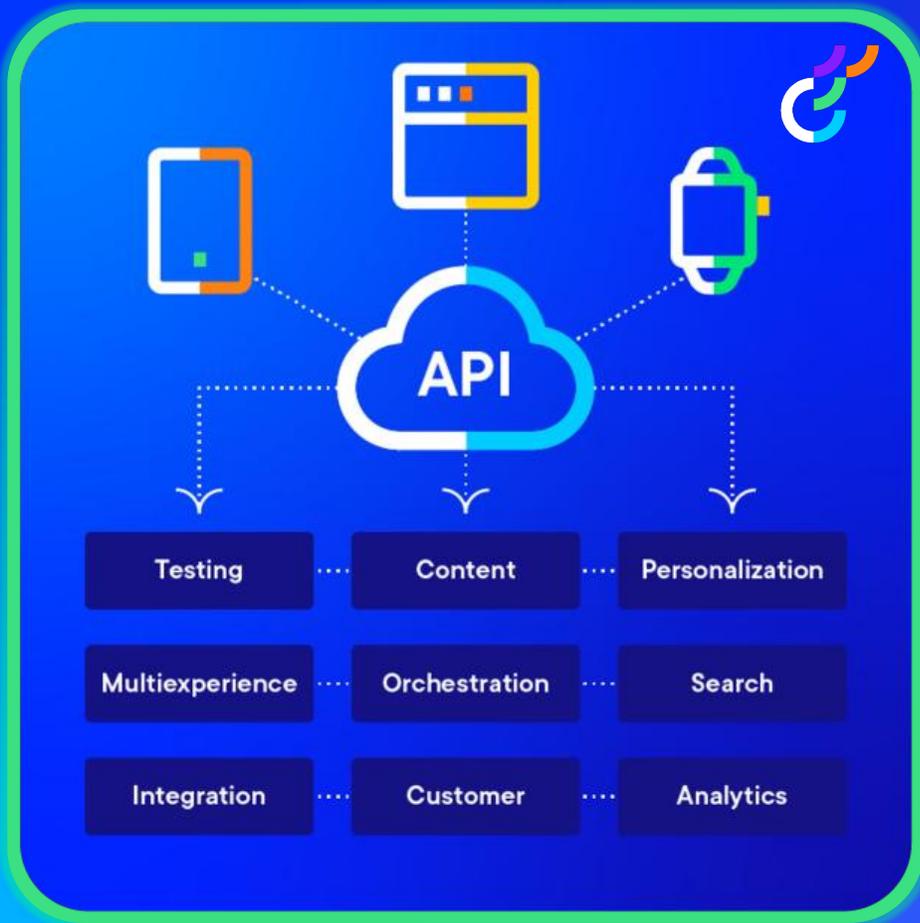

Front-end presentation and back-end functionality are tightly coupled in single code-base

DIY Composable

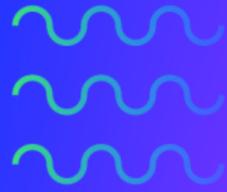

DIY combination of providers selected for each back-end and front-end component

Composable Platform

Out-of-the-box functionality that can be configured/decoupled as needed

Our Mission

Deliver a smart, composable
SaaS Digital Experience Platform
that serves both marketing
practitioners and developers.
